Services	qty	unit price	amount
Sewer Injector Pumps	1.0	\$32,780.97	\$32,780.97
<p>Quote is to replace both sewer pumps, inside basin at city park. Pumps are 7.5 hp 3 phase. Special order Meyers. Had to research and run serial and model numbers to match pumps to retrofit inside basin and insure proper alignment of guard rail/flange for proper seal and operation. Pumps are special order and ordered and being built estimated build time 5-6weeks with freight and shipping. Pumps to be freighted to our office and delivered to job site. Also once we were doing troubleshooting and cleaning of pumps was able to determine check valve #1 is bad and will need to replace both check valves due to possible strain and back pressure on new pump. Will cut and reconfigure in secondary basin. And install new check valves to insure proper flow after pump discharge. Will test and program panel to work with new pumps.</p> <p>Pumps have manufacturer warranty. Serial number and model to be recorded.</p> <p>1yr parts and labor warranty.</p> <p>\$34,580.97 With discounted partial credit for previous invoice for pump pull. \$1800.00</p> <p>Total \$32,780.97</p>
