Consultant is not a designated employee within the meaning of the Political Reform Act because Consultant:

a. will conduct research and arrive at conclusions with respect to his/her rendition of information, advice, recommendation or counsel independent of the control and direction of the City or of any City official, other than normal agreement monitoring; and

b. possesses no authority with respect to any City decision beyond rendition of information, advice, recommendation or counsel. (FPPC Reg. 18700(a) (2).)

12. Ability of Consultant. City has relied upon the training and ability of Consultant to perform the services hereunder as a material inducement to enter into this Agreement. Consultant shall therefore provide properly skilled personnel to perform all services under this Agreement. All work performed by Consultant under this Agreement shall be in accordance with applicable legal requirements and shall meet the standard of quality ordinarily to be expected of competent Consultants in Consultant's field of expertise.

13. Compliance with Laws.

a. Consultant shall comply with all local, state and federal laws and regulations applicable to the services required hereunder, including any rule, regulation or bylaw governing the conduct or performance of Consultant and/or its employees, officers, or board members.

14. Licenses. Consultant represents and warrants to City that it has the licenses, permits, qualifications, insurance and approvals of whatsoever nature, which are legally required of Consultant to practice its profession. Consultant shall maintain a City of Lake Elsinore business license.

15. Indemnity. Consultant shall indemnify, defend, and hold harmless the City and its officials, officers, employees, agents, and volunteers from and against any and all losses, liability, claims, suits, actions, damages, and causes of action arising out of any personal injury, bodily injury, loss of life, or damage to property, or any violation of any federal, state, or municipal law or ordinance, to the extent caused, in whole or in part, by the willful misconduct or negligent acts or omissions of Consultant or its employees, subcontractors, or agents, by acts for which they could be held strictly liable, or by the quality or character of their work. The foregoing obligation of Consultant shall not apply when (1) the injury, loss of life, damage to property, or violation of law arises from the sole negligence or willful misconduct of the City or its officers, employees, agents, or volunteers and (2) the actions of Consultant or its employees, subcontractor, or agents have contributed in no part to the injury, loss of life, damage to property, or violation of law. It is understood that the duty of Consultant to indemnify and hold harmless includes the duty to defend as set forth in Section 2778 of the California Civil Code. Acceptance by City of insurance certificates and endorsements required under this Agreement does not relieve Consultant from liability under this indemnification and hold harmless clause. This indemnification and hold harmless clause shall apply to any damages or claims for damages whether or not such insurance policies shall have been determined to apply. By execution of this Agreement, Consultant acknowledges and agrees to the provisions of this Section and that it is a material element of consideration.

its elected or appointed officers, officials, employees, agents and volunteers. Any insurance maintained by the City, including any self-insured retention the City may have, shall be considered excess insurance only and shall not contribute with it.

iv. The insurer waives all rights of subrogation against the City, its elected or appointed officers, officials, employees or agents.

v. Any failure to comply with reporting provisions of the policies shall not affect coverage provided to the City, its elected or appointed officers, officials, employees, agents or volunteers.

PROJECT UNDERSTANDING

This proposal is based on your emails dated December 12, 2022 and the attached "Survey Limits" PDF, hereby incorporated by reference. It is our understanding that the City of Lake Elsinore is designing a City Hall building and will require additional topographic mapping, including surface utility features, along the alley just easterly of Main Street between Peck Street and Limited Street.

You have also requested that we map the right of way of the alley and crossing streets. A preliminary review of San Diego County records shows a moderate level of recent surveying activity, including portions of this project area. It is possible that during the performance of our survey we will find one or more circumstances that will trigger the requirement to file a Record of Survey with the County Surveyor to be in compliance with the provisions of the Professional Land Surveyors Act of California. We have included an optional scope and fee for preparation of an RS map should the need arise.

PROJECT LIMITS

Topographic and utility mapping will include the street and alley areas shown on the "Survey Limits" PDF, copy attached.

SCOPE OF WORK

Project Survey Control

- Establish project control for topographic and right of way surveying purposes and for future use during the construction phase. It is our understanding that previous topographic mapping has been prepared and we can relate our survey control to previous mapping datum if requested by the City, assuming the City can clearly identify the horizontal and vertical datums and existing benchmarks or control points.
- If there is no preference for a previous datum, we will relate our mapping to CCCS83 Zone 6 by ties to Continuous GPS stations and to NAVD88 by ties to the nearest City benchmark.
- Prepare notes for title sheet.

Topographic Mapping

- Perform field survey for topographic mapping purposes according to the requested items on the "Survey Limits" PDF.
- Download and process field data. Prepare topographic mapping and DTM surface as an AutoCAD/C3D drawing file.
- Prepare title sheet with notes, including project control and right of way notes.

Right of Way Mapping

- Research record maps that are available on the Riverside County My Survey Research website.
- Perform field survey to recover survey monuments for street and alley right of way mapping purposes.
- We will include the lot lines of abutting lots/parcels based on record information and assessor maps only. Our survey does not include surveys of lot/parcel lines. The lots/parcels will be labeled with owner name, street address and assessor parcel number as disclosed by publicly available records.

- Download and process field data. Prepare right of way mapping as an AutoCAD/C3D drawing file.
- Prepare notes for title sheet.

Record of Survey (Optional)

- Prepare Record of Survey map and supporting documents and calculations as required by the Riverside County Surveyor's office.
- Respond to County Surveyor map review comments.

Utility Mapping

- Obtain utility map and atlas information from the local providers, including gas, water, storm, sewer, cable, telephone, electric, and communications. Compute approximate alignments of subsurface utilities from record maps and atlases.
- Our field survey for topographic mapping will include visible surface utility features within the mapping limits, such as meters, valves, backflow devices, manholes, inlets, drains, hydrants, poles and overhead wires, light poles, traffic control devices, markers and paddles, etc. Storm and sewer manholes will be opened, dipped for invert elevations, and pipe sizes and directions noted if visible, unless the manhole or inlet is locked closed or if doing so would be a potential threat to the safety of our field personnel.
- Download and process data and create utility mapping as an AutoCAD drawing. Subsurface alignments will be oriented and adjusted to the surveyed locations of surface features where possible. Subsurface locations will be approximate and are based on best available evidence.

Utility Detection & Marking (Optional)

- We will engage the services of a utility locating subconsultant to detect and mark subsurface utilities in the mapping area prior to beginning of field surveying tasks.
- Include paint marks left by subconsultant in our field survey.

Potholing (Optional)

- We will engage the services of a utility locating subconsultant to perform up to maximum of five (5) potholes. The subconsultant has included permitting and traffic control in their scope for this task.
- Perform field survey of pothole markers left by subconsultant.

ASSUMPTIONS & RESPONSIBILITIES

The following assumptions have been made:

- There is no requirement for an Encroachment Permit to perform the field survey work and the utility detection and marking work.
- The City will notify the landowners and/or tenants of our work and arrange for access as needed.
- The City will provide Record of Survey filing and recording fees when requested. Guida can also pay the fees and invoice as reimbursable expense with a 5% markup.
- The City will decide on the Utility Detection & Marking Option prior to the start of field surveying so that the Guida crew can include the paint marks in our survey.
- The City will determine the location of up to 5 potholes and provide direction. We assume that all potholes can be performed in one mobilization.

EXCLUSIONS

All services not specifically described, including the following items, are excluded from our scope of work:

- Construction surveying.
- Other title research, title reports.
- Individual lot/parcel line surveys.

- Traffic control plans, permits, and services if required to safely complete survey work and utility detection & marking work in city streets.
- Government agency fees, filing fees, recording fees.
- Excessive or unreasonable map review comments. Our budget includes three submittals of any one document, map, or file: two drafts and a final.
